Data

World Bank Country and Lending Groups

For the current 2021 fiscal year, low-income economies are those with a GNI per capita, calculated using the World Bank Atlas method, of $1,025 or less in 2019; lower middle-income economies are those with a GNI per capita between $1,026 and $4,035; upper middle-income economies are those with a GNI per capita between $4,036 and $12,535; high-income economies are those with a GNI per capita of $12,536 or more.

Please note: Regions in this table include economies at all income levels. The term country, used interchangeably with economy, does not imply political independence but refers to any territory for which authorities report separate statistics. Aggregates are based on the World Bank classification of economies for operational purposes.

You can also download the current classification by income in XLS format, the historical classification by income in XLS format, and the comparison with the previous fiscal year.

BY REGION	BY INCOME	BY LENDING
East Asia and Pacific	Low-income economies	IDA
Europe and Central Asia	Lower-middle-income economies	Blend
Latin America & the Caribbean	Upper-middle-income economies	IBRD
Middle East and North Africa	High-income economies	
North America		
South Asia		
Sub-Saharan Africa		

Bold indicates a change of classification.
