

ANTI-DUMPING INVESTIGATION No. AD0012

Anti-dumping investigation on aluminium extrusions originating in the People's Republic of China

The Goods Concerned

As stated in the [Notice of initiation](#) the description of the goods subject to the investigation is

Bars, rods, profiles (whether or not hollow), tubes, pipes; unassembled; whether or not prepared for use in structures (e.g. cut to length, drilled, bent, chamfered, threaded); made from aluminium whether or not alloyed, containing not more than 99.3% aluminium. The product concerned is commonly referred to as 'aluminium extrusions', referring to its most common manufacturing process even if it can also be produced by other production processes such as rolling, forging or casting.

The goods concerned are subject to the following commodity codes: 76041010; 76041090; 76042100; 76042910; 76042990; 76081000; 76082081; 76082089; 76109090.

The commodity codes are given as guidance and not all goods within these commodity codes fall within the description above. For the avoidance of doubt, the goods concerned refer to unassembled, aluminium extrusions and therefore aluminium structures, parts of structures and goods prepared for use in structures, subassemblies or components; products that are imported in "finished goods kit", and welded tubes and pipes, are not part of this investigation.
