Product Description

Kaolin for Fiberglass Production in Refractory Factory Directly

Kaolin is a significant industrial clay that mainly contains a hydrated aluminum silicate mineral named as kaolinite (Al2Si2O5(OH)4)[1, 2]. Other kaolinminerals include dickite, nacrite, and halloysite. Pure forms of these minerals are not as ubiquitous as kaolinite, and are usually found along with kaolinite in hydrothermal deposits[1]. Kaolin may form in residual or sedimentary modes. In the former type, kaolinite is created by in-situ weathering or hydrothermal alteration of aluminosilicate parent rocks like granite; though, in the latter, the mineral is produced by the deposition of kaolinite formed elsewhere

Size:
200mesh, 325mesh, 500mesh, 600mesh, 1250mesh, 2500mesh, 4000mesh

Specification

Kaolin for Fiberglass Production in Refractory Factory Directly

We have calcined kaolin, washed kaolin, metakaolin.Calcined kaolin, also known as porcelain clay.

It has high whiteness, high fineness, good plasticity, and has strong corrosion resistance and good durability.

It is an excellent raw material for making ceramics and rubber.

Product information	
Brightness(R457,%)	≥93
Moisture(%)	≤0.8
Particle Size(-2μm, %)	81±3
Oil Absorbency g/100g	62.5±2.5
Screen residue (325 mesh,%)	≤0.005
PH	6.0-7.5
True Density,g/cm3	2.65-2.75
Volume Density,Kg/L	0.4-0.6

Character

1. High refractoriness.

2. Physicochemical stability.

3. Bulk density high .

4. Low porosity.

5. Low water absorption.

6. Fully calcined

7. Low impurity content.

8. White or nearly white.

The feature of kaolin

Associative viscosity and contact
degeneration drying performance sinterability
firing shrinkage refractoriness suspension
property and dispersion adsorption and
commutativity chemical stability electronic
insulativity

Application

Kaolin for Fiberglass Production in Refractory Factory Directly

Suitable for high-grade latex paint, paint, paint, ink, rubber, plastic, wire and cable, etc..

1 paper, paint can replace some of the expensive titanium dioxide.

2 paint, water-based latex paint.

3 rubber and special cable reinforcing agent, industrial plastic functional filler, ink, food, medicine, cosmetic packing.

4 advanced ceramics and specialty ceramics.
