

**COOPER COATED COIL**  
WORLD LEADING COATING TECHNOLOGY

7<sup>th</sup> June 2021

## **Statement of Intended Preliminary Decision**

### **Transition Review TF0006 – Safeguard Measures on certain Steel Products**

Dear sirs

We note with interest that within your draft proposals published on 19<sup>th</sup> May 2021, it is proposed that as per our request from 2020 that aluminised steel that is not manufactured in the UK be removed from safeguarding measures.

As they currently stand, the proposal contains a provision to exclude tariff code 7210 6900 30. Whilst this is a positive step forward, to completely remove aluminised steel from these measures, the following codes would also need to be excluded safeguarding measures

- 7210 6900 20
- 7210 6900 80

We hope that you can positively consider that these codes also be added to the draft proposals before the new measures are finalised.

Yours faithfully

Cooper Coated Coil Limited
