

TRANSITION REVIEWS No.TD0004 and No. TS0005

Anti-Dumping and Countervailing duties on biodiesel originating in the United States of America and consigned from Canada

Note to Public File

29th November 2021

Following the publication of a Notice of Initiation on 11 August 2020, the Trade Remedies Authority (TRA) is conducting transition reviews (TS0005 and TD0004) of UK trade remedies measures in relation to Biodiesel originating in the USA and consigned from Canada.

As part of these transition reviews, the TRA has undertaken verification of information received from UK producers. The TRA has provided two of the UK producers, Greenergy Fuels Ltd and Argent Ltd, with confidential versions of the verification reports in accordance with regulation 59(1) Trade Remedies (EU Exit) (Dumping and Subsidisation) Regulations 2019.

The TRA has requested that these producers provide non-confidential versions of the verification reports in line with the TRA's [guidance on non-confidential information](#).

The TRA has received a non-confidential verification report from Argent Energy, and this has been placed on the public file. The TRA has sought to engage with Argent Energy regarding the contents of the verification report, however the company is unable to make amendments to the non-confidential version.

Greenergy has provided a non-confidential version of this report, which is available on the public file.
